DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 3 recites the limitation "the overlayed options" in line 3 of the claim. There is insufficient antecedent basis for this limitation in the claim. Examiner recommends the term --the selected options-- to maintain consistency.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily

published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1, 2, 5-8, 11, and 13-28 rejected under 35 U.S.C. 102(e) as being anticipated by Smith et al. Smith et al disclose a computer implemented method for remote ordering (see col. 3, lines 39-41) comprising the steps of providing graphical selection of a plurality of options for a base component in an interactive environment, overlaying selected options on the item, and graphically updating the consumer item on the visual display (col. 9, lines 44-57). A user interface (100) presents information about the consumer item. The user may not select invalid options that don't conform with previously selected options (col. 9, lines 58-64).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 2167

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 3, 4, 9, 10, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith et al. Smith et al disclose all of the limitations of the claims except for the steps of dragging and dropping the options, updating the consumer item in real-time, and using the Internet to place the order. However, it is common in the art to drag items, and it would have been obvious to one of ordinary skill in the art at the time the invention was made to employ the step of dragging and dropping the option to allow the user flexibility in its placement. Real-time updating is also common in the art, and it would have been obvious to one of ordinary skill in the art at the time the invention was made to update the consumer in real-time to allow the consumer to quickly see the updated product. It is also common in the art to order items via the Internet. It would have been obvious to one of ordinary skill in the art at the time the invention was made to send the order to the manufacturer via the Internet because the Internet allows efficient transfer of information.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Morohashi et al, Imamura et al, and Henson disclose methods of selecting options for a remote order.
